Freeman and Brian Bracegirdle The ESHRE Special Interest Group in Embryology published the Atlas of Embryology in 2000 as a supplement to Human Reproduction. This initiative was Schoenwolf and Mathews, Atlas of Descriptive Embryology, 6e This comprehensive atlas is unique in combining information on the embryological development of the human with detailed presentation of the congenital.

Atlas of human embryology. From Oocytes To Preimplantation Embryos. Edited by M. Cristina Magli Gayle M. Jones. Kersti Lundin Etienne Van den Abbeel. An ESHRE SIG Embryology Initiative. For Loredana Papale, in memorium. Now her passion for Embryology and her strong belief in Embryologists taking a leading role will last forever. Bibliography for Figures. Arroyo Cardona G, Institut Universitari Dexeus, 7508028 Barcelona, Spain: Figures 125, 242, 302. As an atlas, it is a showcase for the incomparable artwork of Dr. Frank H. Netter. The Netter paintings in this Atlas were published in The Netter Collection of Medical Illustrations, Dr. Netter's series of systemic monographs that integrate anatomy, embryology, physiology, pathology, functional anatomy, and clinical anatomy. They were also published in the Clinical Symposia that address particular topics. Another important focus is the embryological basis of congenital birth defects. Descriptive embryology can be an educational goal, but the study of embryology is more effective, rewarding, and relevant when it is placed in a biological or clinical context that goes beyond the embryo itself. Sabin FR. and Knower H. An atlas of the medulla and midbrain, a laboratory manual (1901) Baltimore: Friedenwald. By Florence R. Sabin. A Laboratory Manual. Illustrated With Seven Colored Plates, One Black Plate And Fifty-Two Figures. Edited By. Henry McE. Knower, PH.D. Instructor in Anatomy in the Johns Hopkins University, Baltimore, Md. Baltimore, Md., U. S. A. The Friedenwald Company. Publishers. 1901. Copyright, 1901, By Florence R. Sabin. The Friedenwald Company Baltimore, Md M U. S. A

The Netter paintings in this Atlas were published in The Netter Collection of Medical Illustrations, Dr. Netterâ€™s series of systemic monographs that integrate anatomy, embryology, physiology, pathology, functional anatomy, and clinical anatomy. They were also published in the Clinical Symposia that address particular topics.Â Another important focus is the embryological basis of congenital birth defects. Descriptive embryology can be an educational goal, but the study of embryology is more effective, rewarding, and relevant when it is placed in a biological or clinical context that goes beyond the embryo itself. In 2000, the ESHRE Special Interest Group in Embryology (SIG-E) published as a supplement to Human Reproduction the â€œAtlas of Embryologyâ€, a long waited reference resource that was extensively used by embryologists in the following many years. More recently in 2012, the same SIG produced an electronic and updated edition of the Atlas.Â Now, in 2016, the SIG-E releases a web version of the â€œAtlas of Embryologyâ€, accessible from PC, tablets and smartphones. Although not authentically â€œdigital nativeâ€, nevertheless as a generation of embryologists we have at our disposal a multitude of formidable information and communication technologies tools. The development of a web Atlas was therefore inescapable.

In 2000, the ESHRE Special Interest Group in Embryology (SIG-E) published as a supplement to Human Reproduction the "Atlas of Embryology", a long waited reference resource that was extensively used by embryologists in the following many years. More recently in 2012, the same SIG produced an electronic and updated edition of the Atlas. Now, in 2016, the SIG-E releases a web version of the "Atlas of Embryology", accessible from PC, tablets and smartphones. Although not authentically "digital native", nevertheless as a generation of embryologists we have at our disposal a multitude of formidable information and communication technologies tools. The development of a web Atlas was therefore inescapable.
