As a yacht, the Buizen performs admirably. A first place in the inaugural Round the World Millennium Odyssey Race and a second in its division in the gruelling Sydney to Hobart attest to its strength and speed. Its hull is hand laid solid fibreglass with triaxial reinforcement glass cloth, incorporating vinylester and polyester resins. All bearers, bulkheads, runners, stringers, floors and joinery are glassed into the hull for strength and rigidity. All timber is milled by our own factory and all joinery hand built by our own cabinetmakers and customised for each yacht. All stainless steel fittings are custom made. Self furling sails and motorised winches let you pilot this thoroughbred at the touch of a button. Over 45 years in the yachting industry, YPI has developed and nurtured strong relationships with the best superyacht shipyards, contractors and designers in the industry. At the same time, we work with total independence, combining accurate market intelligence with specific knowledge of each contractor to secure the best rates for every individual project and ensure our clients' interests remain prioritised at all times. Refits: what we do. Refit specification, budget preparation and cost control. Bid and quotation from recognised shipyards and contractors, shipyard supervision during the refi
