I then outline the key decision areas in international financial management: foreign exchange risk management, managing working capital and the internal financial system, financing foreign units, capital budgeting, and evaluation and control. I emphasize the additional parameters that MNC financial executives must cope with, including multiple currencies, rates of inflation, tax systems, and capital markets, as well as foreign exchange and political risks. Suggested answers to “The debate over outsourcing”. What are the pros and cons of outsourcing? Also, firms may become multinational to keep domestic customers that have moved abroad or to exploit financial market imperfections. These are elaborated below. search for raw materials.
Focused on real-life decision making in an international context, this text demystifies and simplifies multinational financial management in a clear, conceptual framework. The approach is to treat international financial management as a natural and logical extension of the principles and valuation framework provided by domestic corporate financial management to account for real-life decision making in an international context, this text demystifies and simplifies multinational financial management in a clear, conceptual framework.
