The Interpersonal Communication Book

Joseph A. DeVito

The book’s philosophical foundation continues to be the notion of choice. Choice is central to interpersonal communication; as speaker, listener, and communication analyst, you are constantly confronted with choice points at every stage of the communication process and these choices will influence the effectiveness of your messages and your relationships. The Interpersonal Communication Book provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. Recognized for its ability to help students understand the crucial connection between theory and practice, this thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides students to improve their interpersonal communication skills.
The book’s philosophical foundation continues to be the notion of choice. Choice is central to interpersonal communication; as speaker, listener, and communication analyst, you are constantly confronted with choice points at every stage of the communication process and these choices will influence the effectiveness of your messages and your relationships. Interpersonal communication describes the process of communicating ideas, thoughts, and feelings to another person or a group of people. Interpersonal communication skills are acquired behaviors which improve with knowledge and practice. Interpersonal communication occurs between at least two people who usually interact face-to-face and act at the same time as objects and subjects of knowledge, message receivers, and message senders. The nature of interacting is different when communicating with friends, family, or strangers, but the aim is always to learn more about the other person using both v
