Contents

12 Periodical literature
   Thomas Broman

13 Natural philosophy for fashionable readers
   Mary Terrall

14 Rococo readings of the book of nature
   E. C. Spary

15 Young readers and the sciences
   Aileen Fyfe

16 The physiology of reading
   Adrian Johns

III PUBLICATION IN THE AGE OF SCIENCE

17 A textbook revolution
   Jonathan Topham

18 Useful knowledge for export
   Eugenia Roldán Vera

19 Editing a hero of modern science
   Lisa Jardine and Alan Stewart

20 Progress in print
   James Secord

Afterwords

Books, texts, and the making of knowledge
   Nick Jardine

The past, present, and future of the scientific book
   Adrian Johns

Notes on contributors

Index
This inviting book tells a great adventure story: the history of science. It takes readers to the stars through the telescope, as the sun replaces the earth at the center of our universe. From award-winning science writer John Gribbin, Science: A History is the enthralling story of the men and women who changed the way we see the world, and the turbulent times they lived in. From Galileo, tried by the Inquisition for his ideas, to Newton, who wrote his rivals out of the history books; from Marie Curie, forced to work apart from male students for fear she might excite them, to Louis Agassiz, who marched his colleagues up a mountain to prove that the ice ages had occurred.
