Interest Fields. Explore any links on the left to find out more about what kinds of career opportunities exist. Your interest and passion for the field will be your greatest asset and guide you in your decision-making process. The majority of these do NOT require a degree in a directly-related field. At each interest field link (left column) you'll find information about Translations in context of "fields of interest" in English-Russian from Reverso Context: Exchanges of information, views and good practices in fields of interest to both organizations at any level should be encouraged. Arabic German English Spanish French Hebrew Italian Japanese Dutch Polish Portuguese Romanian Russian Turkish. Did you mean: field of interest. These examples may contain rude words based on your search. These examples may contain colloquial words based on your search. I wouldn't use "field of expertise" if you don't yet have expertise in that field, which it sounds like you don't since you refer to it as "new" and are seeking mentorship. Another word you might use is "subject.". A "subject" is also an area of study but can have a less-broad connotation than "discipline" does because of being more closely associated with coursework, but that isn't necessarily the case.
