In his first book, *The Birth of Tragedy*, Nietzsche observes that Greek tragedy gathered people together as a community in the sight of their gods, and argues that modernity can be rescued from 'nihilism' only through the revival of such a festival. This is commonly thought to be a view which did not survive the termination of Nietzsche’s early Wagnerianism, but Julian Young argues, on the basis of an examination of all of Nietzsche’s published works, that his religious communitarianism in fact persists through all his writings. What follows, it is argued, is that the mature Nietzsche is neither an ‘atheist’, an ‘individualist’ nor an ‘immoralist’: he is a German philosopher belonging to a German tradition of conservative communitarianism – though to claim him as a proto-Nazi is radically mistaken. This important reassessment will be of interest to all Nietzsche scholars and to a wide range of readers in German philosophy.

Acknowledgements

I am grateful to the German Academic Exchange Service, the University of Auckland Research Committee and the University of Auckland Arts Faculty for grants which supported the writing of this book. And to Christoph Jamme of the University of Lüneburg and Günter Seubold of the University of Bonn (where Nietzsche was briefly a student) for useful discussions of the substance of the work. I am grateful to Kathleen Higgins for helpful references to secondary literature concerning Zarathustra’s ‘Ass Festival’, and to Friedrich Voit for enlightening background information that only a Germanist would know. I am particularly grateful to my colleagues in the Auckland Philosophy Department, Robert Wicks, Markus Weidler, Rosalind Hursthouse and especially Christine Swanton who helped make my thoughts a lot clearer than they would otherwise have been. My greatest debt, however, is to the German historian Thomas Rohkrämer of the University of Lancaster who generously allowed me to read portions of the unpublished manuscript of his forthcoming study of the roots of National Socialism within the tradition of right-wing German thought, a study that is certain to become essential reading on the topic.
Abbreviations

Nietzsche’s works are cited using the following abbreviations: roman numerals refer to major parts of the works; arabic numerals refer to sections, not pages. The exceptions to this are (i) references to extraneous material included in translations of Nietzsche’s published works (generally editorial comments and excerpts from the Nachlass) in which case I cite page numbers, and (ii) references to KSA which I cite by volume number followed by the notebook number and, in brackets, the note number (e.g. 13 14 [204]). For bibliographical details of the works cited see pp. 216–17 below. Sometimes I have preferred my own translation to that provided in the translation cited.

Schopenhauer’s works are cited as follows:

FR  The Fourfold Root of the Principle of Sufficient Reason
PP  Parerga and Paralipomena
WR  The World as Will and Representation
Nietzsche spoke of “the death of God,” and foresaw the dissolution of traditional religion and metaphysics. Some interpreters of Nietzsche believe he embraced nihilism, rejected philosophical reasoning, and promoted a literary exploration of the human condition, while not being concerned with gaining truth and knowledge in the traditional sense of those terms. Nietzsche’s intense association with Wagner no doubt enhanced his orientation towards the philosophy of Schopenhauer, and it probably promoted his work in aesthetics and cultural criticism. These biographical elements came to bear on Nietzsche’s first major works, while the middle period amounts to a confrontation with many of these influences.
