Individuals suffering diabetes mellitus should participate actively in educational interventions, focused on self-care, that is, caring for and taking.

Diabetes management has five components and involves constant assessment and modification of the treatment plan by healthcare professionals and daily adjustments in therapy by the patient. Nutritional Management. The foundations. Nursing Assessment. The nurse should assess the following for patients with Diabetes Mellitus: Assess the patient's history. To determine if there is presence of diabetes, assessment of history of symptoms related to the diagnosis of diabetes, results of blood glucose monitoring, adherence to prescribed dietary, pharmacologic, and exercise regimen, the patient's lifestyle, cultural, psychosocial, and economic factors, and effects of diabetes on functional status should be performed. Nursing Management Diabetes Mellitus Covenant School of Nursing N201 Fall, 2009 Gloria Rodriguez, MSN.RN,CDE Objectives

- By the end of this lecture students should be able to:
- Differentiate between type 1 and type 2 diabetes mellitus
- Identify the diagnostic and clinical significance of blood glucose test results
- Describe the major complications of DM
- Differentiate between DKA and HHNS Diabetes Mellitus
- A. chronic multi-system disease related to abnormal insulin production or impaired insulin utilization. Risk Factors
- Family Hx. Of diabetes
- Obesity esp. abdominal and visceral adipose
- Management of non-insulin-dependent diabetes mellitus (NIDDM) requires teamwork. The doctor should work closely with the nurse and other members of the diabetes health care team, whenever available, and with the person with diabetes.
- Self-care is an essential strategy. Education of the person with diabetes and his/her family is the cornerstone of management. Without appropriate education, the desired therapy targets are difficult, or even impossible to achieve. People with diabetes should be encouraged and enabled to participate actively in managing and monitoring their condition.
