What will follow, once the innovative society phase of socio-economic development creates affluence, which diminishes human ambition to work in order to have?

Transformation of Society and Economy Under the Influence of Digitization. Ed. by Popkova, Elena G. / Alpidovskaya, Marina. Series: Interdisciplinary Thought of the 21st Century 1. De Gruyter Oldenbourg. At the beginning of the 21st century, technological progress accelerated, providing new perspectives on the formation of high-tech societies, in which comprehensive digitization is achieved and the focus of social interactions is not only human but also through technical devices that are equipped with artificial intelligence. The coming changes will significantly influence each human and the whole of humankind. Philosophers, social scientists, legal theorists, geneticists, mathematicians, computer scientists, and engineers all have important roles to play. The pressing debates require a careful balancing of diverse values, interests, rights, and considerations. The impact of technology on the economy and global markets cannot be overstated. Several of the most highly valued companies are data-driven innovators. That is why companies such as Apple, Google, Microsoft, Amazon, and Facebook, alongside traditional technology power-houses, such as Intel, IBM and AT&T, and new upstarts, including Uber and Snap, are the focus of heated consumer discussion and regulatory debate.¹⁴ This trend goes beyond the United States and, more broadly, the Western world.
